Position of CFS	<ul style="list-style-type: none"> Information on product distribution outside France is not available from the website of the Rappel Conso of France. The Centre for Food Safety (CFS) is investigating whether the affected product has been imported to Hong Kong and is contacting the relevant authority for further information. Preliminary investigation did not identify local sale or import of the affected product. Acquisition of the product through online purchase or international travel cannot be excluded. 								

食物事故報表 Food Incident Post

- Consumers should discard the product and not consume it.
- CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.
- Investigation by CFS is ongoing.
- People contract *E. coli*, which is a gastro-intestinal infection, through consumption of contaminated water or undercooked and contaminated foods. Intestinal bleeding and serious complications such as haemolytic uraemic syndrome (HUS) may also develop in some people. Moreover, due to poor personal hygiene, person-to-person transmission of this pathogen is possible through oral-faecal route. *E. coli* cannot survive under high temperature and can be killed by thorough cooking.
