<b>Position of CFS</b>	<ul style="list-style-type: none"><li>• Acquisition of the products through online purchase or international travel cannot be excluded.</li><li>• Norovirus, a virus smaller than bacteria, is a major cause of non-bacterial food poisoning resulting in infectious gastro-intestinal diseases. Symptoms include nausea, vomiting, diarrhoea and abdominal cramps etc. Norovirus mainly exists in dirty water. Shellfish living in polluted waters or vegetables irrigated with water from polluted origins are easily contaminated.</li><li>• Consumers should discard the products and not consume them.</li><li>• CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.</li></ul>
