the affected product.

	• Acquisition of the product through online purchase or
	international travel cannot be excluded.
	 Consumers should discard the product and not consume it. CFS will remain vigilant and monitor for any new development
	and take appropriate actions when necessary.
	 Investigation by CFS is ongoing.
	 People contract E. coli, which is a gastro-intestinal infection,
	through consumption of contaminated water or undercooked
	and contaminated foods. Intestinal bleeding and serious
	complications such as haemolytic uraemic syndrome (HUS)
	and even death may develop in some cases. Moreover, due
	to poor personal hygiene, person-to-person transmission of this
	pathogen is possible through oral-faecal route. E. coli cannot
	survive under high temperature and can be killed by thorough
	cooking.
